March 2017

Notice on the Special Exhibition “*Geodaisia* – Modern Cartography from Tadataka Ino to Remote Sensing”

Next month, the JP Tower Museum INTERMEDIATHEQUE (IMT) is opening the special exhibition “*Geodaisia* – Modern Cartography from Tadataka Ino to Remote Sensing.”

At the University Museum, the University of Tokyo, where we have established Globalbase, a synthetic database centered on modern maps, as a pillar of our museum activities, we have taken this opportunity to reconsider the historical development of cartography, from modern mapping techniques established by Tadataka Ino (1745-1818) all the way to contemporary remote-sensing technologies, which have made possible digital maps based on aerial and satellite photography.

Key Information

[Title] Special Exhibition “*Geodaisia* – Modern Cartography from Tadataka Ino to Remote Sensing”

[Dates] April 14 – September 3, 2017

[Opening Hours] 11:00 - 18:00 (open until 20:00 on Friday and Saturday; last entry 30 minutes before closing)

*Opening hours may change.
